Social Networking, Web 2.0 and Project Management

Karen Patten, Ph.D, CHE, Assistant Professor, USC

Before we can implement Social Networking and Web 2.0 technologies within the workplace, we need to define what exactly is social networking. What are Web 2.0 technologies? What are the issues and risks to the organization the CIO must consider? What really are the end user needs for these technologies? In this workshop, Dr. Patten will first define various aspects of social networking and Web 2.0 using an "Enterprise 2.0 Planning Framework." Then, she will work with you to determine how to collect requirements and to do a project management risk assessment.

3:45 – 4:00 pm

Closing Remarks

Tom Dunnigan, SC.GMIS President
